RealTerm Energy Welcomes Two New Senior Hires

MONTREAL, QC – RealTerm Energy Corp. is pleased to announce two new senior level appointments. Mr. Angelos Vlasopoulos has joined the firm as Chief Financial Officer, and Mr. Scott Vokey has joined in the new position of Director, Government Relations and Community Services.

As CFO, Angelos will have overall responsibility for the financial integrity of the company and will direct our rapidly expanding geographic footprint across North America, including our M&A activities as the company grows into new jurisdictions. Angelos is a Certified Public Accountant and brings with him almost 20 years of corporate accounting, finance and operations experience in both private and public sector companies. Prior to joining the firm, Angelos was a Vice President at Brookfield Asset Management and held the position of Chief Financial Officer of MediSolution Ltd., a public company located in Montreal. He has also worked in the Audit & Advisory Services practice at Deloitte & Touche LLP, and was most recently the President and Chief Executive Officer at Aeson Leeds Inc., as well as sitting on the Board of Directors of Pyrogenesis Inc., a publicly traded Canadian technology company listed on the TSX Venture exchange.

As the former Energy Services Manager for Local Authority Services (LAS), the procurement arm of the Association of Municipalities of Ontario, Scott was instrumental in setting up and managing a number of government energy efficiency programs in Ontario, chief among them the LAS/RealTerm Energy partnership, which has delivered turnkey LED streetlight upgrades to almost 150 cities and towns throughout the province of Ontario. Under Scott's guidance, this program rapidly became (and continues to be) the most successful procurement program in LAS's history and has helped make RealTerm Energy one of the largest LED streetlight integrators in the world. We are pleased that RealTerm Energy can now offer Scott's expert counsel and extensive knowledge of government programs and policies to the firm and to the new communities we serve as we continue to grow to new municipal clients throughout Canada and the USA. In addition to his 10+ years developing municipal policy, Scott has Bachelor's degrees in both Arts and Education, as well as Master's degrees in Arts and Science from multiple Canadian universities.

Said Sean Neely, President of RealTerm Energy, "We're delighted to welcome both Angelos and Scott to the company, where their extensive experience and counsel will inevitably assist us as we grow. As key members of our firm's expansion, we are confident that both individuals will be able to help us continue to offer the most comprehensive streetlight and smart city solutions in the marketplace to cities across North America and beyond."
